Get Started

3. Klik “Get started” > “Allow”

google.com/?code=cc04ea451cf581cf5a8ffd3fe2262a4a81220232d3b96346f02133dcc5784f8c

4. Setelah klik allow Moka akan membuka halaman redirect URL dengan “?code=” dibelakangnya

Contoh:
https://google.com?code=6655ef1f5cd5db41ee94a3b77c30e5b43ade5b0365c6f017b9452bbec547a0af

Gunakan code tersebut untuk ditukar menjadi access token

7 OAuth token

1. Pakai postman:
   URL: POST https://api.mokapos.com/oauth/token
   Body:
   {
   "client_id": "client_id_anda dari step no.2",
   "client_secret": "client_secret_anda dari step no.2",
   "code": "code dari step no.5",
   "grant_type": "authorization_code",
   "redirect_uri": "redirect_uri anda dari step no.2 (Harap untuk menambahkan https:// pada URL"
   }

2. Setelah itu anda akan mendapatkan access token yang nanti dapat dipakai untuk mengakses api.
