

Panduan Update kode API Moka

Sebagai bagian dari ekosistem GoTo yang terus berkembang, kami selalu berupaya untuk memberikan layanan dan performa terbaik untuk pelanggan. Untuk dapat beradaptasi dengan kebutuhan pelanggan, kami sadar bahwa kami perlu memperbarui sistem kami untuk menjawab kebutuhan dari partner kami.

Khususnya, kami akan mengubah implementasi *integer-based transaction IDs* menjadi UUID. Untuk memastikan proses integrasi Moka dengan partners tetap lancar, kami membutuhkan bantuan dari partners untuk memperbarui codes masing-masing supaya bisa mendukung implementasi UUID ini.

API External

Berikut adalah API dengan *integer id* yang akan kami ubah. Kami tidak akan menghapus *field*-nya, namun akan mengubah *value*-nya menjadi 0 (no) untuk setiap data yang baru. Selain itu, kami juga akan mengimplementasikan *value* baru yang bisa digunakan sebagai *unique identifier* sebagai penggantinya.

Group	Endpoints	Deprecated Request Fields	Replacement Request Fields
Invoices	GET /v2/outlets/{outlet_id}/invoices/{invoice_id}	<code>invoice_id <integer></code> using <code>data.invoices[0].id</code> on reportInvoicesV2	<code>invoice_id <string></code> using <code>data.invoices[0].uuid</code> on reportInvoicesV2 or using <code>data.invoices[0].id</code> on reportInvoicesV3
Checkout API	POST /v1/outlets/{outlet_id}/checkouts	<ol style="list-style-type: none"> 1. <code>data.id</code> 2. <code>data.parent_payment_id</code> 3. <code>data.payment_taxes[i].id</code> 4. <code>data.payment_taxes[i].payment_id</code> 5. <code>data.payment_gratuities[i].id</code> 6. <code>data.payment_gratuities[i].payment_id</code> 7. <code>data.payment_discounts[i].id</code> 8. <code>data.payment_discounts[i].payment_id</code> 9. <code>data.checkouts[i].id</code> 10. <code>data.checkouts[i].payment_id</code> 11. <code>data.checkouts[i].parent_checkout_id</code> 	<ol style="list-style-type: none"> 1. <code>data.uuid</code> 2. <code>data.parent_payment_uuid</code> 3. <code>data.payment_taxes[i].uuid</code> 4. <code>data.payment_taxes[i].payment_uuid</code> 5. <code>data.payment_gratuities[i].uuid</code> 6. <code>data.payment_gratuities[i].payment_uuid</code> 7. <code>data.payment_discounts[i].uuid</code> 8. <code>data.payment_discounts[i].payment_uuid</code> 9. <code>data.checkouts[i].uuid</code> 10. <code>data.checkouts[i].payment_uuid</code> 11. <code>data.checkouts[i].parent_checkout_uuid</code>
